Teaming up for cures: Progress and promise in stem cell research

Teaming up for cures: Progress and promise in stem cell research

Date: Thursday March 7

Time: 6:30 pm - 7:45 pm

Location:

Grand Ballroom
Hyatt Regency San Francisco
5 Embarcadero Center
San Francisco, California, USA 94111

RSVP:

<http://www.mosaicevents.com/CIRMpublicmeeting/index.aspx>

Light snacks will be provided and a cash bar will be available.

The state stem cell agency supports teams of researchers working toward therapies in 40 different diseases. This event will highlight a few of those teams with talks and an interactive Q&A with researchers involved in developing stem cell therapies.

Come learn how state funds are fueling the generation of new therapies for debilitating diseases and conditions like spinal cord injury, diabetes, blindness, cancer and neurodegenerative diseases like Alzheimer's, Parkinson's, ALS (Lou Gehrig's disease) and Huntington's disease.
